

terest in not permitting Sarajevo to be shelled and hundreds of thousands of people's lives to be destroyed and in working for a peaceful agreement.

I have not committed ground troops to this conflict. I have said that we will participate in NATO air strikes, and I think it is the right thing to do. But I hope the air strikes will not be necessary, and they will not occur if the Serbs will comply.

Thank you.

NOTE: The President spoke at 11 a.m. in the Old Family Dining Room at the White House. A tape was not available for verification of the content of these remarks.

Announcement on the White House Conference on Aging

February 17, 1994

The President announced today that he is formally calling for a White House Conference on Aging to be convened in May of 1995.

"I am pleased to resume the proud traditions of White House Conference on Aging begun by President John F. Kennedy in 1961," said the President, noting that there has not been a White House Conference on Aging since 1981. "The fact that this will be the last White House Conference on Aging of the 20th century makes this one even more significant."

Under the terms of the Older Americans Act, which authorizes that such a Conference be held, a 25-member policy committee chosen jointly by the President and the Congress will be selected to work out the specifics of the Conference, including its agenda and the number of participants. Earlier in the fall, President Clinton announced his selection of Robert B. Blancato, formerly of the National Italian-American Foundation and the former House Select Committee on Aging, to be the Executive Director of the White House Conference on Aging.

"An older America must soon face a new century," concluded the President. "A 1995 White House Conference on Aging allows us to plan for this challenge by working together to develop policy recommendations for the

21st century. We owe this to future generations."

Memorandum on Research Involving Human Subjects

February 17, 1994

Memorandum for the Vice President and the Heads of Executive Departments and Agencies

Subject: Review of Federal Policy for the Protection of Human Subjects

Federally funded biomedical and behavioral research has resulted in major advances in health care and improved the quality of life for all Americans. The pursuit of new knowledge in these fields of research often requires experiments that involve human subjects. Although human subjects research is an essential element of biomedical and behavioral research, bioethical considerations must influence the design and conduct of such research.

Since 1947, when guidelines for research with human subjects were promulgated, there has been increasingly widespread recognition of the need for voluntary and informed consent and a scientifically valid design of experiments involving human subjects.

Over time, this recognition has evolved into a rigorous and formalized system of regulations and guidelines, which were codified in governmental policies on human subject research, and were included in the former Department of Health, Education and Welfare's regulations in 1974, 45 C.F.R. 46. In 1991, 16 agencies formally adopted the core of these regulations in a common Federal Policy for the Protection of Human Subjects. This Policy requires that all research protocols involving human subjects be reviewed by an Institutional Review Board. This review ensures that (1) risks are minimized and reasonable in relation to anticipated benefits; (2) there is informed consent; and (3) the rights and welfare of the subjects are maintained (56 Fed. Reg. 28003 (June 18, 1991)).

Although these regulations provide the framework for protecting human subjects in research, we must exercise constant care and ensure that these regulations are strictly en-
