

communications networking, information and data dissemination and technology transfer, and collaborative team building for RD&D projects; and

(c) facilitate use of new information technologies for rapid dissemination of information on biobased products and bioenergy to and among farm operators; agribusiness, chemical, forest products, energy, and other business sectors; the university community; and public interest groups that could benefit from timely and reliable information.

**Sec. 7. Definitions.** For the purposes of this order:

(a) The term "biomass" means any organic matter that is available on a renewable or recurring basis (excluding old-growth timber), including dedicated energy crops and trees, agricultural food and feed crop residues, aquatic plants, wood and wood residues, animal wastes, and other waste materials.

(b) The term "biobased product," as defined in Executive Order 13101, means a commercial or industrial product (other than food or feed) that utilizes biological products or renewable domestic agricultural (plant, animal, and marine) or forestry materials.

(c) The term "bioenergy" means biomass used in the production of energy (electricity; liquid, solid, and gaseous fuels; and heat).

(d) The term "old growth timber" means timber of a forest from the late successional stage of forest development. The forest contains live and dead trees of various sizes, species, composition, and age class structure. The age and structure of old growth varies significantly by forest type and from one biogeoclimatic zone to another.

**Sec. 8. Judicial Review.** This order does not create any enforceable rights against the United States, its agencies, its officers, or any person.

## **Memorandum on Biobased Products and Bioenergy**

August 12, 1999

*Memorandum for the Secretary of Agriculture, the Secretary of Energy, the Secretary of the Treasury, the Administrator of the Environmental Protection Agency*

**Subject:** Biobased Products and Bioenergy

Today I issued an Executive Order, "Developing and Promoting Biobased Products and Bioenergy," to further the development of a comprehensive national strategy that includes research, development, and private sector incentives to stimulate the creation and early adoption of technologies needed to make biobased products and bioenergy cost-competitive in national and international markets.

Consistent with the objectives and activities in that order and to ensure that the Nation moves efficiently to exploit the benefits of expanded use of biobased products and bioenergy, I hereby direct as follows:

- (1) The Secretaries of Agriculture and Energy, in consultation with other appropriate agencies, shall, within 120 days of this memorandum, prepare a report outlining and assessing options for modifying existing respective agency programs in fiscal year 2001 to promote biobased products and bioenergy with a goal of tripling U.S. use of biobased products and bioenergy by 2010. Programs include, among others, conservation and utility programs within the Department of Agriculture (including the Conservation Reserve Program and the Environmental Quality Incentives Program); technology assistance and other small business programs; and education and extension programs. The report also shall include an assessment of: (a) the evidence to determine whether modifications to the tax code are a cost-effective policy option for review by the Department of the Treasury; and (b) the potential to expand use of biobased products and bioenergy by Federal agencies including co-firing with biomass at Federal

facilities, use of biofuels in Federal vehicles, and Federal procurement of biobased products and bioenergy. Such expanded use shall be consistent with agency opportunities and the President's budget.

(2) In preparing this report, the agencies shall:

(a) work closely with the Environmental Protection Agency to ensure that actions recommended reflect a careful review of the environmental benefits, concerns, and net environmental consequences created by expanded use of biobased products and bioenergy. The factors considered should include:

(i) impact on net emissions of greenhouse gases including carbon sequestered by biomass crops, and substituting low net-carbon, biobased products, and bioenergy for products manufactured from fossil fuels; and

(ii) emissions of criteria pollutants and air toxics and other environmental consequences of production of biobased products and bioenergy; and

(iii) changes in water quality, soil erosion, pesticide and fertilizer use, and wildlife habitat as a consequence of changes in land use associated with biomass production; and,

(b) consider the findings and recommendations of the recently released National Academy of Sciences report "Biobased Industrial Products;" the recommendations contained in "Technology Vision 2020: The U.S. Chemical Industry" by the American Chemical Society, American Institute of Chemical Engineers, Chemical Manufacturers Association, Council for Chemical Research, and the Synthetic Organic Chemical Manufacturers Association; the recommendations by the U.S. agricultural, forestry, and chemical communities from the "Plant/Crop-based Renewable Resources 2020: A Vision to Enhance U.S. Economic Security Through Renewable Plant/Crop-Based Resource Use;" and, "Agenda

2020" by the U.S. Forest Products Industry; and (c) consider input from other sources, including public-private strategic plans developed by the Departments of Agriculture and Energy, the Environmental Protection Agency, National Science Foundation, Department of the Interior, and other agencies bioenergy (power, fuels, and heat), commercial and industrial chemicals, and other products and materials.

(3) The Secretaries of Agriculture and Energy shall, within 120 days of this memorandum, report on outreach efforts to raise the Nation's awareness of the useful applications, benefits, and costs of producing biobased products and bioenergy and adopting biobased technologies including workshops on new biomass crops and technologies for producing and marketing biobased products and bioenergy.

**William J. Clinton**

### **Videotape Remarks to the "Safe Schools, Safe Students: What Parents Can Do" Teleconference**

*August 12, 1999*

Hello and welcome to the many parents, students, educators, and community leaders meeting in schools all across our Nation tonight. I want to thank you for taking part in this vital discussion about safe schools and safe students.

Several months ago, after the tragedy in Littleton, I called on the American people to wage a national campaign to keep our schools and our children safe. I am pleased that you and so many other Americans in so many communities are doing just that, stepping up to your responsibility, joining hands in the search for common ground and concrete solutions.

The tragic incidents of gun violence in recent months underscore the importance of your efforts. The shooting just this week at the Jewish community center in Los Angeles,
