

course. It's a good course. It plays hard, but it's an honest course.

Q. What do you think of Queenstown?

The President. I wish I had weeks to spend here. You know, when we were coming in the airplane, landing, everybody on our plane was just gasping when we saw the landscape. It's just so beautiful. You're all very fortunate.

Q. When are you coming back, Mr. President?

The President. How about next week? [Laughter]

Round of Golf

Q. [Inaudible]

The President. This guy hits the ball further than any person his age I've ever played with, including a lot of the pros I've played—water treatment.

Mr. Shipley. Just not as straight as the pros.

The President. And it's only because his public service has kept him from playing every day that he's not a scratch golfer.

Chelsea Clinton

Q. What did Chelsea do today?

The President. I think she looked around here and went running. I don't think she went caving or anything as great as yesterday.

NOTE: The exchange began at 6:41 p.m. at the Millbrook Resort. In his remarks, the President referred to his golf opponents, club pro John Griffin and publisher Mike Robson. Burton Shipley is the husband of Prime Minister Jennifer Shipley of New Zealand. A tape was not available for verification of the content of this exchange.

Proclamation 7220—National Hispanic Heritage Month, 1999

September 14, 1999

By the President of the United States of America

A Proclamation

During National Hispanic Heritage Month, we reflect on the history of a people who were part of this land long before the birth of the United States. Hispanics were among the earliest European settlers in the

New World, and Hispanics as a people—like their many cultures—share a rich history and great diversity. Hispanic Americans have roots in Europe, Africa, and South and Central America and close cultural ties to Mexico, the Caribbean, Central America, South America, and Spain. This diversity has brought variety and richness to the mosaic that is America and has strengthened our national character with invaluable perspective, experiences, and values.

Through the years, Hispanic Americans have played an integral role in our Nation's success in science, the arts, business, government, and every other field of endeavor, and their talent, creativity, and achievements continue to energize our national life. For example, Hispanic Americans serve as NASA astronauts, including Dr. Ellen Ochoa, the first Hispanic woman in space. Mario Molina of the Massachusetts Institute of Technology shared a Nobel Prize in chemistry for research that raised awareness of the threat that chlorofluorocarbons pose to the earth's protective ozone layer. Cuban-American writer Oscar Hijuelos earned a Pulitzer Prize for fiction.

The achievements of today's Hispanic Americans build upon a long tradition of contributions by Hispanics in many varied fields. Before Dr. Ochoa and other Hispanic Americans began to explore the frontiers of space, Hernando de Soto and Francisco Vásquez de Coronado ventured into the vast uncharted land of the New World. A thousand years before Mario Molina calculated the effects of human actions on the atmosphere, Mayan priests accurately predicted solar and lunar eclipses. And before Oscar Hijuelos described a Cuban family's emigration to 1940s America, Miguel de Cervantes Saavedra gave us the classic adventures of Don Quixote and Sancho Panza.

Today, people of Hispanic heritage are an increasingly important and growing segment of our Nation's population. Studies show that, in just a few years, Hispanics will form the largest minority group in the United States. In little more than a decade, Hispanic Americans will wield buying power of nearly \$1 trillion per year. And by the middle of the next century, if population trends continue, almost one-fourth of our population

will be Spanish-speaking. The success of these citizens is vital to our continued national prosperity, and we must ensure that they are empowered with the tools and opportunities they need to thrive in the next century.

That is why my Administration has worked to widen the circle of economic opportunity, enforce our civil rights laws, invest in health and education, and promote racial reconciliation. We have launched a major initiative to mobilize the resources and expertise of the Federal Government, the private sector, and local communities to end racial and ethnic disparities in health conditions and health care. We established the first-ever Office of Minority Health Research and Alternative Medicine at the National Institutes of Health. We also have sought to expand our Hispanic Education Action Plan with an additional \$480 million for improving educational programs and institutions serving high concentrations of Hispanic students. We cannot seize the enormous opportunities of the 21st century if a large percentage of our children lack the skills and knowledge they need to reach their full potential.

In honor of the many contributions that Hispanic Americans have made and continue to make to our Nation and our culture, the Congress, by Public Law 100-402, has authorized and requested the President to issue annually a proclamation designating September 15 through October 15 as "National Hispanic Heritage Month."

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim September 15 through October 15, 1999, as National Hispanic Heritage Month. I call upon government officials, educators, and the people of the United States to honor this observance with appropriate ceremonies, activities, and programs, and I encourage all Americans to rededicate themselves to the pursuit of equality.

In Witness Whereof, I have hereunto set my hand this fourteenth day of September, in the year of our Lord nineteen hundred and ninety-nine, and of the Independence of the United States of America the two hundred and twenty-fourth.

William J. Clinton

[Filed with the Office of the Federal Register, 8:45 a.m., September 16, 1999]

NOTE: This proclamation was published in the *Federal Register* on September 17.

Memorandum on the Working Group on International Energy
September 14, 1999

Memorandum for the Assistant to the President for Science and Technology

Subject: Working Group on International Energy

The report of the President's Committee of Advisors on Science and Technology (PCAST), *Powerful Partnerships: The Federal Role in International Cooperation on Energy Innovation*, will help advance my Administration's goals for addressing energy-linked economic, environmental, and security challenges. As you point out in the synthesis of the report, our window of opportunity for moving the world off of its current energy trajectory—which entails higher consumer costs, greater regional pollution, more pronounced climate disruption, and increasing risks to energy security—is closing fast. Thus, we should act expeditiously on PCAST's recommendations for strengthening capacities for energy technology innovation, promoting technologies to limit energy demand and for a cleaner energy supply, and improving management of the Federal international energy research and development portfolio.

As a first step, I direct you to form a working group on international energy research, development, demonstration, and deployment under the National Science and Technology Council, as recommended by PCAST. The working group should build on the PCAST report and assess the portfolio of programs underway in the Federal agencies and develop a strategic vision, including budget recommendations that can be considered in agency requests for FY 2001.

Please commend John Holdren, the members of his panel, and all of PCAST for its fine report on this important matter.

William J. Clinton
