

Out here in this audience today, there may be another future great President; there may be another future great business leader; there may be another future great minister; there may be someone who will discover an absolute cure for AIDS; there may be someone who will design a car that will get 500 or 600 miles a gallon. All of you think about that. One of you could do that. And every one of you can have a good life and do something that makes a difference and have children of your own that will have even better lives. That's what GEAR UP is all about. We believe in you. And we want you to believe in yourselves.

Good luck, and God bless you.

Now, symbolizing what every student who completes this program will do, Congressman Fattah and I are going to give Toya Doe, representing all of you, her 21st Century Scholars Certificate. I hope that all of you will have these, go through this program, and finish it. This is a ticket to the future. And remember, if you gear up, you'll get to college. And after that, there's no stopping you.

So let's give Toya another big hand. [*Applause*]

NOTE: The President spoke at 2:40 p.m. in the auditorium. In his remarks, he referred to Toya Doe, student, who introduced the President; Janet C. Samuels, University City Cluster Leader; Armita B. Sims, Overbrook Cluster Leader; and Pedro Ramos, president, Philadelphia Board of Education.

### **Statement on China-European Union Negotiations on China's Accession to the World Trade Organization**

*May 19, 2000*

I welcome the conclusion of the bilateral negotiations between China and the European Union on China's accession to the WTO. This agreement highlights the importance of congressional passage of permanent normal trade relations with China.

It is now clearer than ever that China will join the World Trade Organization. For America to reap the broad benefits of China's historic decision to open its markets and to strengthen the forces of positive change in China, Congress must enact PNTR. A vote

against PNTR will cost America exports and jobs, cede this massive new market to our competitors in Europe and Japan, and embolden those resisting reform in China.
