

the District of Columbia, and the Commonwealth of Puerto Rico were recognized through our Adoption Incentives Program for their efforts to enhance their adoption and child welfare programs. These efforts have contributed to an increase in adoptions from 28,000 per year in 1996 to an estimated 51,000 in 2004. In addition, the AdoptUSKids initiative, which includes public service announcements in English and Spanish and a website, www.AdoptUSKids.org, has helped place more than 5,000 children in permanent homes over the last 3 years.

As we observe National Adoption Month, we recognize the many caring families who have made a difference in a child's life through adoption. By giving these children the love, guidance, and support they need to grow, adoptive and foster families play a vital role in helping the next generation of Americans achieve their dreams.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2005 as National Adoption Month. I call on all Americans to observe this month with appropriate programs and activities to honor adoptive families and to participate in efforts to find permanent homes for waiting children.

In Witness Whereof, I have hereunto set my hand this second day of November, in the year of our Lord two thousand five, and of the Independence of the United States of America the two hundred and thirtieth.

George W. Bush

Proclamation 7953—National Diabetes Month, 2005

November 2, 2005

By the President of the United States of America

A Proclamation

Americans of all ages and backgrounds live with diabetes. Nearly 21 million of our citizens have this disease, and researchers estimate that more than 6 million of these individuals have not been diagnosed and are unaware they have it. National Diabetes Month is an opportunity to educate citizens about diabetes and what they can do to help prevent and treat this disease.

Type 1 diabetes, once known as juvenile diabetes, destroys insulin-producing cells and usually strikes children and teenagers. Nearly 95 percent of all diabetics suffer from type 2 diabetes, a condition in which the body fails to produce or to use insulin properly. Type 2 diabetes typically occurs in inactive or obese adults or individuals with a family history of the disease and now increasingly appears in inactive or overweight children. Because of a lack of insulin, diabetics face potential blindness, nontraumatic amputations, kidney disease, and increased risk of heart disease and stroke.

Studies have shown that minor weight loss and daily exercise can help prevent and reduce the effects of diabetes. I encourage all Americans to follow the new dietary guidelines released by the Department of Health and Human Services earlier this year that emphasize the importance of nutritious foods and regular physical activity. In addition to taking steps toward a healthier lifestyle, Americans should consult their doctors for preventive screenings to detect diabetes in its earliest stages. Under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, these screenings are now covered for Medicare beneficiaries. These simple tests can save lives and help prevent this potentially life-threatening illness.

My Administration remains committed to fighting diabetes through research and prevention, and we will continue to support the

National Institutes of Health (NIH) and others in their efforts to combat this disease. This year, the NIH dedicated more than \$1 billion to diabetes research. The Centers for Disease Control and Prevention (CDC) and the NIH are also sponsoring the National Diabetes Education Program, which has helped to inform more than 180 million Americans in the last 3 years about healthy choices and the risk factors of diabetes.

During National Diabetes Month and throughout the year, we pay tribute to the doctors, nurses, scientists, researchers, and all those dedicated to the fight against diabetes. I urge the millions of Americans living with this disease and all citizens to lead healthy lives and to motivate others to do the same. By working together to prevent this disease, we can improve the quality of life for more Americans.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2005 as National Diabetes Month. I call upon all Americans to learn more about the risk factors and symptoms associated with diabetes and to observe this month with appropriate programs and activities.

In Witness Whereof, I have hereunto set my hand this second day of November, in the year of our Lord two thousand five, and of the Independence of the United States of America the two hundred and thirtieth.

George W. Bush

Proclamation 7954—National Hospice Month, 2005

November 2, 2005

By the President of the United States of America

A Proclamation

The great strength of America lies in the hearts and souls of our citizens. During Na-

tional Hospice Month, we recognize hospice caregivers who are building a more compassionate society, where life is valued and those in need can count on the love and support of others. We also recognize the courage and strength of terminally ill patients and their families.

When we help those who hurt and those in pain, we become part of our Nation's armies of compassion. Hospice programs provide an option for individuals with terminal illnesses to be cared for as they choose in their final days, often in their own homes and surrounded by the love of their families. The doctors, nurses, counselors, volunteers, and others who provide hospice care throughout our country bring comfort to those most in need every day, treating terminally ill patients with the dignity and respect they deserve. By dedicating themselves to the care of those approaching the end of life, they demonstrate great love.

The compassion reflected in hospice care is one of the reasons America has the best health care system in the world. Our whole Nation is grateful for the good work of our dedicated medical professionals and hospice caregivers. By taking the time to care for others, they are making America a better place.

Now, Therefore, I, George W. Bush, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim November 2005 as National Hospice Month. I encourage all our citizens to observe this month with appropriate programs and activities. I also ask Americans to recognize our health care professionals and volunteers for their contributions to helping those facing terminal illness receive quality care.

In Witness Whereof, I have hereunto set my hand this second day of November, in the year of our Lord two thousand five, and of the Independence of the United States of America the two hundred and thirtieth.

George W. Bush
