

Annual Report

of

The Public Printer

Fiscal Year 1961

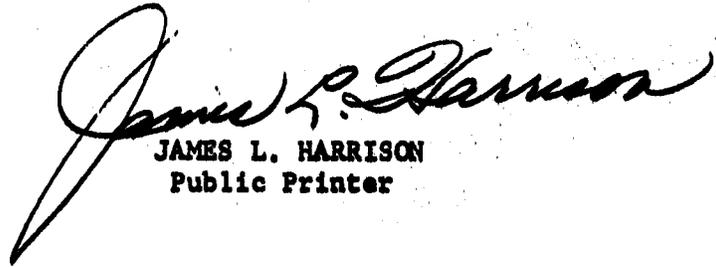

January 3, 1962

REPORT OF PUBLIC PRINTER  
FISCAL YEAR 1961

The following annual report is prepared from the records of the Government Printing Office for the fiscal year 1961. During 8-1/2 months of this fiscal year the previous administration directed the operations of this Office.

When I assumed office on March 17, 1961, I found that an 8 year long economy program had brought a severe reduction in personnel with the result that service as well as building maintenance programs were in need of immediate attention. The scale for determining prices for printing and binding products had not been revised for 8 years and therefore was not in line with wage rates and other costs, resulting in a deficit of \$809,188 in printing and binding operations for the fiscal year.

During my first 3-1/2 months in office action was taken to remedy this condition as well as to relieve some deterioration of the physical plant. The basic scales are in the process of correction to insure full cost recovery and for the next fiscal year I expect to issue a report showing the Office to be on a sound, efficient, and productive basis as the result of action already taken or scheduled to be put into effect.

JAMES L. HARRISON  
Public Printer

## PERSONNEL DIVISION

On June 14, the Public Printer requested a review be made of the programs in each division to identify, select, and develop competent career managers. The Public Printer then approved establishment of a coordinating committee to consolidate these activities. As a result, the chairman of the committee forwarded memoranda to the heads of all divisions requesting that they submit, within 60 days from receipt of memoranda, the identity of employees they believe to have potential to become competent career managers.

The Board of U. S. Civil Service Examiners of the Office has been conducting preliminary work preparatory to announcing new examinations for Hand Compositor, Cylinder Pressman, Offset Pressman, Offset Duplicating Press Operator, Lithographic Offset Pressman, Printing Plant Worker, and Apprentice.

It was possible to meet recruitment needs in all positions with the exception of Proofreader and Monotype Keyboard Operator. Total number of 1141 employees were hired through registers maintained by our Board.

A new Medical Officer entered on duty on October 24, 1960. This official has had many years of experience in the field of industrial medicine. A number of improvements were made during the year, including the acquisition of resuscitative equipment, oxygen, parenteral fluids, and in an emergency the Medical Section is now equipped to administer blood plasma. New treatment chairs are being acquired, which will reduce waiting time.

The professional staff of six graduate nurses, one secretary-clerk, and one physician has the responsibility of care for those employees who are taken ill or are injured during their hours of employment. This privilege and responsibility has to do with a two-fold objective; first, to give to all employees prompt, courteous, and efficient medical care, the paramount objective being the interest and welfare of the individual employee; second, to cooperate and assist those responsible for production and good administration by keeping the man-hour loss from sickness and injury to a minimum.

Training of eight first-aid instructors has been conducted, from which will be formed a nucleus to teach first aid in conjunction with our Civil Defense activities.

The Blood Donor Program ended one of its most successful years; 860 pints of blood were donated by employees. As a result, the Office exceeded its quota. As recognition for this achievement,

the Office was presented a certificate, which was accepted on behalf of the Public Printer by the Chief, Employee Relations Section.

The Federal Employees' Health Benefits Act became effective on July 10, 1960, and 86 percent of our employees are covered under the plan of their choice. Also, there are a number of employees not enrolled who are covered through the enrollment of a family member.

The Appointment, Retirement, and Records Section processed 5,125 personnel actions requiring the preparation of Standard Forms 50 during the 1961 fiscal year. This was an increase of 578 over the previous year. In addition, 6,206 wage adjustments were prepared on electronic data processing equipment.

Full-time appointments for the year increased to 741 from 565 last year, while separations increased from 569 to 619. Total promotions for the year were 570, an increase of 207 over last year. Retirements totaled 239, an increase of 72 over last year.

Annual-salaried employees in salary levels comparable to Classification Act grades received a salary increase of 7.5 percent on July 10, 1960. All hourly journeymen and sub-journeymen received wage increases during the year. Employees paid a single-annual rate based on journeyman rates received a \$291.20 (14¢ an hour) increase on October 23, 1960, and an additional \$83.20 (4¢ an hour) on April 23, 1961. Other single-annual rate employees whose salaries are based on sub-journeyman rates received an increase of \$124.80 (6¢ an hour) on September 18, 1960.

Approval was received in the Fall of 1960 to appoint additional bookbinders, bindery women, compositors, linotype operators, proofreaders, and monotype keyboard operators. Because our registers for these positions did not contain sufficient eligibles to fill approved vacancies, it was decided to try paid advertising. Want ads were placed in the Detroit News, Chicago Tribune, St. Louis Post-Dispatch, Philadelphia Enquirer, and New York Times. About 175 inquiries were received as a result of these ads.

As a further recruiting aid, recruitment flyers were printed for the positions of bindery woman, bookbinder, proofreader, and monotype keyboard operator. About 5,000 each of these were distributed throughout the entire United States by the Civil Service Commission.

Under the training policy of this Office, a total of 26 separate training programs were conducted and attended by 1,108 employees in a variety of position categories. These programs consisted of both on- and off-the-job training. Employees technically qualified and familiar with the subject matter of the various programs were selected as instructors for this training.

## DIVISION OF FINANCE AND ACCOUNTS

The Division of Finance and Accounts is responsible for all fiscal and legal matters. This includes the handling of finances; accounting; bookkeeping; cost recording and accounting; current cost analyses; type measurement; maintenance of accounts payable; audit of vouchers for all purchases; preparation of payrolls; computing charges for all printing and binding; blank paper, supplies, and services furnished to the various departments and agencies of the Federal Government; maintenance of accounts receivable; record keeping and billing for all goods and services furnished by the Office; collecting all monies due the Office from claims, damages, sales of Government property, and goods and services furnished to the Government; measurement of typesetting machine composition for operator averages and statistics; maintenance of the general files; and the determination and execution of traffic requirements of the Office.

The Division is also responsible for all budget work; studies in connection with rates and the scale of prices for work performed, and the current readjustment of such rates; the compilation of costs of each printing job as the work progresses through the plant; audit of payrolls; administration of the annual and sick leave laws and regulations; accounting for and preparation of reports with reference to retirement, health and life insurance deductions; preparation of financial, cost, and statistical statements and reports for the use of the Government Printing Office in general as well as the Joint Committee on Printing, the Treasury Department, the General Accounting Office, the Civil Service Commission, the Bureau of the Budget, and the Congress; the performance of all functions necessary in connection with the administrative processing of claims for and against the Government Printing Office; and the rendering of decision and the furnishing of advice with respect to the applicability of the laws.

The Division is under the supervision of the Comptroller of the Government Printing Office, and is organized as follows:

- Administrative (office of the Comptroller)
- Appropriation Accounting and Auditing
- Electronic Data Processing (and Cost Accounting)
- Payroll and Time Records
- Billing and Collecting
- Traffic
- Composition Measuring
- Computing (and General Files)

## PURCHASING DIVISION

The dollar value of Purchasing Division procurement activity increased to \$56,071,712.91 from the previous year's \$54,726,848. The breakdown is as follows: Commercial printing \$29,838,054.42; paper, envelopes and cartons \$22,645,939.95; materials and supplies \$2,359,009.82; and machinery and equipment \$1,228,708.72.

The value of commercial printing went up by about \$1,750,000 while the cost of paper declined by approximately \$1,250,000.

Tonnage of paper purchased increased from 164,915,606 pounds in 1960 to 175,675,993 pounds in 1961.

The average paper inventory was 30,210,879 pounds, a decrease of 675,000 pounds from the previous year. This figure includes an average of about 2,000,000 pounds on hand awaiting release from Tests.

During the fiscal year 1961 the Stores Section handled 3,323 carloads and approximately 1,400 truckloads of paper weighing approximately 98,788 tons. In addition, 144 million envelopes and 3-1/2 million knockdown boxes or cartons were handled. Approximately 58,000 pieces of miscellaneous materials were received via Parcel Post and motor freight. This has been our busiest year since the ending of World War II.

On February 5, 1961 a section of the roof at our Franconia Warehouse caved in as a result of the heavy snowfall. All operations were suspended for temporary repairs and reinforcing of the roof structure. We were permitted to re-enter the building on February 14, 1961; however, our unloading facilities were not available until March 8, 1961.

During fiscal year 1961 the Printing Procurement Section processed 45,423 printing jobs having an approximate value of \$27,844,794. This was made up of 9,034 jobs valued at \$13,290,453.61 procured by individual bidding, and 39,956 jobs procured on our various program contracts. The estimated value of the program-contract orders is \$14,554,340.58.

The incoming telephone traffic, including local, long-distance, information, and miscellaneous calls averages 500 calls during the peak hours of the day. There was an increase in local calls over fiscal year 1960. Local message units total was 220,692. Long-distance calls decreased to 5,797 at a cost of \$8,728. A great number of the long-distance calls were reversed charges. The General Services Administration and Western Union Teleprinters received and transmitted 8,245

and 3,956 messages—an increase over the previous year.

#### MAINTENANCE DIVISION

Under the administration of the Office that took over in the last quarter of the fiscal year, an extensive program of renovation was undertaken on buildings and equipment. Only the more outstanding of these are reported here.

During the fiscal year the Building Section has replaced over 3,000 square feet of flooring, including concrete, metal-plate-reinforced concrete, and mastic; installed approximately 150 feet of concrete curbing for protection of equipment; renewed or repaired approximately one-third of our total roof area; installed masonry wall, closed in windows, installed glass block, and plastered the new electronic data processing room; cut in two new doorways and enlarged several existing doorways and openings; and performed all plastering and miscellaneous masonry work for the redecoration of the Cafeteria and Harding Hall.

The Carpenter and Paint Section has produced many items for the production divisions during the last fiscal year, such as printers' furniture, planers, flysticks, knife sticks, wedges, quoins, blocks, brake shoes, reglets, and jogging blocks. It also built 27 worktables, 4 trucks, 8 cabinets and bookcases, as well as many minor furniture items. These shop men also serviced a large number of venetian blinds, performed all the millwork required for the carpenters doing installation work, upholstered approximately 250 chairs, made draperies for Harding Hall and several offices, manufactured approximately 18,000 square feet of flooring, and provided lock-and-key service as necessary.

It installed approximately 60,000 square feet of flooring, replaced the rub rails in nearly all freight elevators, installed partitions in 12 different areas, relined Documents Division's spiral chute, installed wood bumpers and constructed forms for concrete bumpers in congested storage areas, installed approximately 2,500 square feet of ceiling tile, and did all the carpentry work required in the installation of new machinery and equipment.

The Paint Shop decorated Harding Hall and the Cafeteria; painted most of the exposed steelwork on the outside of all buildings; and caulked the windows and other critical areas. The 8th floor of all buildings, including most of the furniture, was refinished. The Medical Section was completely refinished, as well as several other offices and areas which, because of their condition or usage, were considered a high priority. In addition to painting, the Paint Shop replaced all broken glass as necessary, replaced aisle lines, markers, and signs as required.

The Electrical Section installed power feeders to the 8th floor of Building 2, 3d floor of Buildings 1, 2, and 3, and 1st and 2d floors of Building 1; installed electrical equipment on 13 new machines and 34 machines that were moved, and increased

lighting in the Proofroom. The Section handled approximately 15,000 calls for service, replaced incandescent fixtures in many locations, serviced and provided preventive maintenance on all elevators, and maintained miscellaneous electronic and communications equipment.

The Machine Section overhauled two stereotype plate-casting boxes; the plants on two molding presses were resurfaced and leveled; 26 multiple-punch heads were rebuilt, including new punches and dies; and the cross feeders on two folding machines were completely overhauled. The Section overhauled one of the 400-ton air-conditioning machines used in the central cooling system. A number of package air-conditioning units were relocated, and regular inspection and preventive-maintenance service was provided for all the equipment supplying our various utilities in the Power Plant.

All of the elevators, hoists, dumbwaiters, and conveyors in the four buildings comprising the GPO received complete mechanical service during the year.

Complete repair service, including overhauls, inspections, lubrication, and preventive maintenance, was rendered to our automotive fleet of 42 trucks and 3 passenger cars, as well as to approximately 175 power industrial trucks.

In the Pipe and Sheet Metal Section, the outstanding jobs completed in the past year include: Conversion of the cooling towers on the roof of Building 3, renovation of the Cafeteria steam tables and related work, modernizing and replacing the outmoded fire extinguishers and hose, completing a major change of operations in the offset camera room, rearranging the air-conditioning ducts for the new IBM room in Building 2, and installation of a filter-washer room in Building 3 penthouse.

The new air-conditioning system has adequate capacity in the refrigeration and water-pumping systems. General Services Administration and the contractor are now attempting to correct deficiencies in several units.

Our safety record, as furnished by the Statistical Division of Bureau of Employees' Compensation, follows:

	<u>1960</u>	<u>1959</u>
Frequency rate	7.1	5.6
Severity rate	625	225
Total cases	205	128
Nonfatal	95	76
Fatal	1	0
Total days chargeable	8,496	3,047
Total cost (incl. leave)	\$97,728	\$38,454
Average number employees	6,539	6,524
Direct cost per employee	\$14.95	\$5.89

## DIVISION OF TESTS AND TECHNICAL CONTROL

The Division tested 11,610 samples during the year as follows:

Paper and envelopes.....	8,560
Metals.....	1,351
Inks.....	272
Inkmaking materials.....	236
Bookbinding textiles.....	645
Bookbinding leathers.....	37
Adhesives and adhesive-making materials.....	51
Oils and greases.....	136
Chemicals.....	134
Miscellaneous.....	<u>188</u>
TOTAL.....	11,610

There were 431 rejects for non-compliance with specifications. Of these, 340 were of paper, 5 of envelopes, 62 of ink or inkmaking material, 20 of textiles, and 4 miscellaneous. Paper rejections amounted to 8,057,063 pounds or 4.20 percent, reflecting an improvement in qualities of paper received.

Numerous advantageous changes or revisions were made in specifications during the year and they, in part, are responsible for the reduction in the number of rejections.

During the year, the total production of printing inks, letterpress, offset, stamp-pad, toning blue, and numbering-machine inks amounted to 249,178 pounds. These inks are manufactured according to standard formulas, and close quality control is maintained throughout their production.

The Chemical Laboratory prepared 1,405 gallons of silver nitrate solution and 1,405 gallons of reducer solution for the silver-spraying operation in the Electrotpe Molding Section of the Plate-making Division.

The total amount of type metal standardized during the fiscal year 1961 was 13,136 pounds, which was 675,344 pounds or 4.86 percent less than during the preceding year.

Press rollers manufactured during the year required 15,414 pounds of composition and totaled 2,124 in number, as compared with 15,109 pounds of composition required for 2,403 press rollers in 1960. Used-roller composition was salvaged and re-used to the extent of 8,752 pounds. Of the number of rollers manufactured, 350 were mechanically coated on specially-prepared synthetic rubber bases by mechanically rotating the base while the hot composition is being deposited upon it. For mechanically-coated rollers, 907 pounds of process glue composition were used.

Cooperative contacts are maintained by the Technical Division with other organizations of the graphic arts industries, including the American Society for Testing Materials; The American Standards Association; The American Newspaper Publishers' Association; Book Manufacturers' Institute, Inc.; the American Pulp and Paper Mill Superintendents' Association; International Association of Printing House Craftsmen; Lithographic Technical Foundation; National Printing Ink Research Institute; Photoengravers' Research, Inc.; Printing Plates Research, Inc.; Technical Association of the Pulp and Paper Industry; Printing, Packaging and Allied Trades Research Association of Great Britain; Paper Makers Association of Great Britain and Ireland; Research Institute for the Graphic and Allied Industries, Amsterdam, Holland; and the Graphic Arts Research Laboratory, Stockholm, Sweden.

### DOCUMENTS DIVISION

During the fiscal year 1961, a total of 163,952,315 publications were distributed, of which 53,334,539 were sold for a gross amount of \$9,359,937, an increase over last year of nearly 10 percent. Realized earnings for return to the U. S. Treasury were \$5,085,240.13.

#### Sales of Publications

The annual physical inventory of sales publications on hand as of June 30, 1961 showed 25,899 different titles for a total of more than 33,000,000 copies of publications. Of the 53 million publications sold, 1,300,220 were sold by the main bookstore and its two branches. Receipts from bookstore sales were \$368,486.68 and 98,751 customers were served.

The Documents Division ordered from the Government Printing Office printing in the amount of \$4,442,349.

#### Documents Library

Total workload for the Library was 53,123 publications for fiscal year 1961.

Compilation of the Numerical List and Schedule of Volumes for the 2d Session of the 86th Congress was completed, and all "back titles", title pages, and tables of contents of the serial set volumes of the 86th Congress, 2d Session were completed.

Among the service functions rendered by the Library were advance classification of 6,347 publications, 714 reference inquiries and loan requests, 910 translations in addition to the 925 foreign letters sent to the Department of State for translation. Duplication of form cards and notices for other sections of the Division, and loan of all publications entered in the Monthly Catalog to the Library of Congress for microfilming.

Fiscal 1961 saw 12,053 miscellaneous documents and periodical issues mailed to depositories, together with 10,817 prints of congressional bills and resolutions. The total number of copies was 5,031,524.

#### FIELD SERVICE DIVISION

The Field Service Division, on March 27, 1961, was removed from the supervision of the Production Manager and placed under the direction of the Deputy Public Printer and was thus brought organizationally closer to the Public Printer for more expeditious handling of its functions and operations.

A comparison of the average number of employees on the rolls of this office and each Field Service Division office during fiscal years 1959, 1960, and 1961 is shown by the following tabulation:

	<u>1959</u>	<u>1960</u>	<u>1961</u>
Office of Superintendent	5	5	5
Chicago	93	92	90
Denver	35	34	36
Dept. Service Office	246	268	265
New York	23	23	23
San Francisco	15	15	15
Seattle	<u>15</u>	<u>15</u>	<u>15</u>
TOTAL	<u>432</u>	<u>453</u>	<u>449</u>

To provide more effective service, the Public Printer, on April 24, 1961, approved the delegation of authority to Field Service Office Managers to procure from commercial sources all printing or related services which they are unable to produce in their own plants because of workload or equipment limitations.

The table on the following page shows the volume of business in the several Field Service offices:

**GPO FIELD SERVICE DIVISION  
BILLINGS TO MAJOR CUSTOMER AGENCIES, FISCAL YEAR 1961**

	Chicago	Denver	D. S. O.	New York	San Fran.	Seattle	Total	%
Post Office	\$ 370,373.19	\$ 18,374.55	\$ 143,248.73	\$ 81,300.84	\$ 10,254.68	\$ 39,526.44	\$ 662,078.43	14.5%
Air Force	114,865.53	32,616.26	239,157.74	403.65	3,055.66	136,010.72	526,149.56	11.5
Army	77,282.04	9,681.73	269,379.63	27,282.79	4,069.67	79,685.89	467,381.80	10.3
Treasury	44,532.51	4,459.83	203,243.61	84,136.89	37,256.04	2,150.77	375,789.65	8.2
Interior	419.17	276,910.70	46,699.19	-	26,061.97	22,200.00	372,291.03	8.2

Total	\$1,106,153.18	\$409,538.04	\$2,216,460.88	\$288,165.16	\$166,065.82	\$351,185.87	\$4,557,569.95	100.0%

## PLANNING

On April 2, 1961, the duties, functions, and responsibilities of the Planning Manager and the Production Manager were consolidated, and the position of Planning-Production Manager was created. At the same time, three new positions were created, namely Assistant Planning-Production Manager for Production; Assistant Planning-Production Manager for Planning; and Assistant Planning-Production Manager for Typography and Design. Many other changes in personnel titles, office space, etc. were made to perfect the reorganization, but probably the most significant actions were the transfers of the Commercial Planning Section from the Planning Service Division to the Purchasing Division and the Field Service Division (formerly under the office of the Production Manager) to the office of the Deputy Public Printer.

The following table shows the volume of work processed for the fiscal year and the four preceding years:

	<u>1957</u>	<u>1958</u>	<u>1959</u>	<u>1960</u>	<u>1961</u>
Orders processed	94,279	92,671	99,293	100,162	99,340
Jackets issued	54,611	50,900	53,225	55,205	52,476
Open jackets issued	2,590	2,477	2,479	3,400	3,470
Schedules established	54,683	54,664	58,116	53,239	52,349
Informal estimates	276	202	200	162	159
Spoilages processed	187	254	196	490	503
Waivers issued	1,544	1,215	1,148	1,248	1,138
Simplified bidding jobs	---	---	---	2,937	2,888*
Page Rate Contract Jobs	---	---	---	1,012	1,822*

\*Number of jobs processed through April 16, 1961. Processing functions for these 2 categories of work transferred to Division of Purchases on April 16, 1961.

While the number of orders for printing and binding received during fiscal year 1961 did not quite equal the number received during the preceding fiscal year, it exceeded the number received during fiscal year 1959.

Receiving and processing these orders requires review for compliance with the statutes; assigning and stamping jackets; adding to the jackets such quantities authorized by law for distribution to designated depositories and libraries, foreign exchange, and file copies as well as quantities ordered by the Superintendent of Documents for sale, and/or on other "rider" requisitions; typing; and recording.

Servicing these orders required thousands of telephone calls, memoranda, and letters, issuing of waivers, processing

spoilages, scheduling, and making room deliveries of proofs, copy, and certain classes of completed work (Bills, Hearings, Committee Prints, Calendars, Briefs, Postal Bulletins, etc.) to Congress and our customer-agencies.

As required by law, sales prices were developed on 6,755 new and reprint publications offered for sale by the Superintendent of Documents.

The number of work jackets prepared for printing and binding requisitions and print orders totaled 39,634. Approximately 8,757 of these jackets were handled at least twice in that they were prepared only in part when originally processed, as proofs were requested, and completed when proofs were returned. Also prepared were 600 "open" jackets. Complete schedules were developed and indicated on approximately 27,477 jackets. Approximately 8,574 of these jackets called for proofs and, therefore, required two or more schedulings, dependent on the number of times proofs were requested. Copies of these jackets and others not scheduled, and other work as hereinbefore described, were made on the Xerox machine, and totaled 148,283 copies.

Delivery schedules were approved and assigned on 3,322 purchase requests for 167,635,993 pounds of paper in flat sheets and rolls; 10,808,008 sheets and pieces of miscellaneous items; 118,360,450 envelopes; and 2,947,300 cartons of various kinds and sizes. These requests were for purchases on the regular quarterly contracts and the open market. In addition, a total of 657 requests were initiated by Plant Planning for special purchase of 16,703,039 pounds of paper in flat sheets and rolls; 1,568,493 envelopes; 185,550 cartons; and 1,178,254 sheets and pieces of miscellaneous items. The number of Stores items prepared for commercial programs and jackets totaled 2,979.

Commercial specifications totaling 1,377 required the typing of 3,475 requisitions for paper, etc. Field Service requisitions processed for paper, etc. totaled 2,106. A total of 9,532 jackets for blank paper and miscellaneous supplies were prepared in accordance with department requisitions and purchase orders.

The table which follows reflects the volume of work passing through the Division of Typography and Design for special handling:

### Art, Illustration, and Typographic Sections

Jackets Processed.....	5,456
Orders & Estimates for Photoengravings.....	4,311
Halftones & Lincuts Ordered.....	43,117
Finished Art Pieces.....	3,608
Layout Sketches.....	2,305
Illus. Retouched Pieces.....	6,319

### Photographic Section

Requests.....	2,914
Finished Pieces.....	34,949

### Amounts Recovered by Direct Charges Against Jackets (Figures provided by the Comptroller)

## PRODUCTION

## Night Production of Congressional Work

The Congressional Record for the fiscal year just closed totaled 22,208 pages, averaging 158.6 pages per issue for 140 issues. This was a reduction in both pages and issues from the previous year, when there were 181 issues containing 31,220 pages, an average of 172.4 pages per issue. Nineteen of the issues contained 256 pages or more, while on June 29 an issue of 368 pages was printed in two parts.

Calendar pages totaled 67,701. There were 3,755 orders for Hearings, Documents, Senate and House Reports, Public and Private Laws, and Committee Prints, totaling 6,119,623 copies.

## Binding

Volume of work statistics for this Division are as follows:

	<u>Pamphlet Section</u>		
	<u>1959</u>	<u>1960</u>	<u>1961</u>
Folding	368,307,524	373,834,681	361,411,533

Library Binding Section

10,964 boxes made  
3,857 miscellaneous cases made  
9,589 portfolios made  
1,009,700 Passports made  
779,625 Passport perforated sheets  
94,760 miscellaneous volumes bound (all styles)  
20,754 binders and credential cases made  
143,225 index cuts made  
3,136 pockets made  
263,801 bellows pockets made  
31,000 pounds of flour paste made  
50,000 pounds of glucose paste made  
9,950 pounds special paste made for Folding Machines

Included in the statistics are 53,734 volumes bound for the Library of Congress. This is a newly established section and has no comparative figures for 1959 and 1960.

## Composition Division

Production records show 2,498,708,300 ems produced this year, whereas the previous figure was 2,724,254,600 gross ems. An apparent loss of 225,546,300 ems would be negligible in comparison with the reduction of 34.6 percent fewer bonus hours and the corresponding drop in gross payroll.

Another, and important factor to be weighed here, would be the continued growth of unmeasurable composition, not appearing in the above ems figure. A total of 17,611.2 hours was charged which would amount to 2,200 man-days.

## Letterpress Division

During the year, the Division put to press a total of 131,273 forms for 586,647,572 impressions. This is a decrease of 6,223 forms and 47,770,067 impressions compared to the previous year. This indicates forms now received in the Division are for fewer copies per form.

## Offset Division

The volume of work processed in the Offset Division is tabulated below and on the following page.

Offset Preparation SectionJackets Processed

	<u>1958-59</u>	<u>1959-60</u>	<u>1960-61</u>

No. of Negs diverted to Photo-engraving for Camera work, hand work performed by Offset Negative Section	21,441	21,767	35,612

Offset Plate Section

	<u>1958-59</u>	<u>1959-60</u>	<u>1960-61</u>
Offset Plates Processed	38,604	40,897	40,063
No. of Prints (Blues Van Dykes)	196,064	190,158	*160,715

\*The 1960-61 figure for prints is misleading in that a larger volume of prints were processed by the Ozalid method during this fiscal year. This is not only a more expeditious method for proofs but is also less costly.

Reproducibles Received from Commercial Contractors for Storage

<u>1958-59</u>	<u>1959-60</u>	<u>1960-61</u>
11,605 jobs	16,620 jobs	18,442 jobs

Reproducibles Issued for Reprint by Plant or Commercial Contractor

<u>1958-59</u>	<u>1959-60</u>	<u>1960-61</u>
7,721 jobs	9,216 jobs	11,340 jobs

Offset Press Section

	<u>1958-59</u>	<u>1959-60</u>	<u>1960-61</u>
Offset Plates put to press	42,675	42,789	42,051
TOTAL Offset Impressions	324,812,011	323,473,983	302,329,013

## Platemaking Division

Personnel in this Division was reduced during the year by  $5\frac{1}{2}$  percent and was accompanied by an approximately equal decline in the square inches of plate production, which totaled 31,450,133. Production, however, was higher than in all of five previous years except 1961.

Types of work produced were:

<u>Type of work</u>	<u>1961 (sq. in.)</u>	<u>1960 (sq. in.)</u>
Photoengraving	3,544,500	3,461,027
Electrotype	3,271,247	3,207,025
Plastics	7,598,798	13,243,542
Rubber stamps and plates	129,500	240,425
Stereotype	16,893,684	13,562,859

The reduction shown from last year is attributable to increased use of the offset process in the Office, for which this Division makes only a part of the negatives used.

## Delivery Section

The count of recorded partial and complete shipments for the year was 141,617, an increase of 1,908. Fleet mileage shows a decrease of 11,109 miles and a reduction in the accident frequency figure for the second consecutive year.

The following table gives a five-year comparison on these subjects:

<u>Fiscal Year</u>	<u>Shipments</u>	<u>Mileage</u>	<u>Accident Frequency</u>
1956-57	133,620	277,125	.72
1957-58	134,921	266,329	1.12
1958-59	138,111	261,217	1.53
1959-60	139,709	269,708	1.11
1960-61	141,617	258,599	.77

Our pickup service shows a continued increase, with requests totaling 3,517, an increase of 65 over last year.
