Federal PKI Compliance Report
September 12, 2014

Date

September 12, 2014

To

Chief Information Officer

From

Inspector General

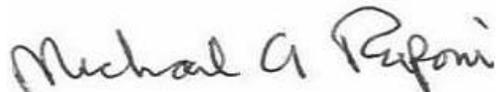

Subject

Assessment Report - Federal PKI Compliance Report
Report Number 14-19

Enclosed please find the subject final report. The Office of the Inspector General administered a contract with Ernst & Young LLP (E&Y) to provide a compliance report of GPO's Public Key Infrastructure (PKI) for July 1, 2013 through June 30, 2014. E&Y conducted their work in accordance with attestation standards established by the American Institute of Certified Public Accountants.

E&Y concluded that GPO's assertion is fairly stated in all material respects. E&Y also issued a Letter of Supplementary Information, concluding that the GPO Principal Certification Authority Certificate Practices Statement conformed in all material respects to the GPO-Certificate Authority and Federal PKI common policies. E&Y is responsible for the attached report and the opinion expressed therein.

We appreciate the courtesies extended to E&Y and to our audit staff. If you have any questions or comments about this report, please do not hesitate to contact Mr. Jeffrey C. Womack, Assistant Inspector General for Audits and Inspections at (202) 512-2009 or me at (202) 512-0039.

Report of Independent Accountants

We have examined the assertion, dated August 21, 2014, by the management of the United States Government Printing Office ("GPO"), that GPO's Certification Authority (GPO-CA) complied with certain requirements of its Certificate Policy (CP), Version 1.3.1 dated August 17, 2009 and its Certificate Practices Statement (CPS) Version 1.7.3 dated April 18, 2014 for the GPO Principal Certificate Authority (GPO-PCA) and its Certificate Practices Statement Version 1.7.4 dated April 18, 2014 for the GPO Subordinate Certificate Authority (GPO-SCA) for the period July 1, 2013 to June 30, 2014, as well as the requirements of the Federal PKI Authority and all current cross-certification Memorandum of Agreements (MOAs) executed by the GPO with other entities.

Management of the GPO is responsible for its compliance with those requirements. Our responsibility is to express an opinion on management's assertion about the GPO's compliance based on our examination.

Our examination was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants and accordingly, included examining, on a test basis, evidence about GPO-CA's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on GPO-CA's compliance with specific requirements.

In our opinion, for the period from July 1, 2013 through June 30, 2014, GPO management's assertion, as set forth in the first paragraph, is fairly stated, in all material respects.

This report is intended solely for the information and use of the GPO and the U.S. Federal PKI Policy Authority and is not intended to be and should not be used by anyone other than those specified parties.

Ernst & Young LLP

August 21, 2014

U.S. GOVERNMENT
PRINTING OFFICE
KEEPING AMERICA INFORMED

Assertion by Management of the U.S. Government Printing Office Regarding Its Disclosure of Its Business Practices and Its Controls Over Its Certification Authority Operations During the Period July 1, 2013 through June 30, 2014

August 21, 21014

The U.S. Government Printing Office (GPO) operates as a Certification Authority (CA) known as the GPO Public Key Infrastructure Certification Authority (GPO-CA) in Washington, D.C. The GPO Principal Certificate Authority (GPO-PCA) and the GPO Subordinate Certificate Authority (GPO-SCA) provide the following certification authority services:

- Subscriber registration
- Certificate rekey
- Certificate issuance
- Certificate distribution
- Certificate revocation
- Certificate status information processing
- Integrated circuit card life cycle management

Management of GPO is responsible for establishing and maintaining effective controls over its CA operations, including CA business practices disclosures, set forth in its Certificate Practices Statements and its Certificate Policy [<http://www.gpo.gov/projects/pki.htm>], service integrity (including key and certificate life cycle management controls), and CA environmental controls. These controls contain monitoring mechanisms, and actions are taken to correct deficiencies identified.

Controls have inherent limitations, including the possibility of human error and the circumvention or overriding of controls. Accordingly, even effective internal control can provide only reasonable assurance with respect to GPO's CA operations. Furthermore because of changes in conditions, the effectiveness of controls may vary over time.

With respect to our compliance with certain requirements in the GPO Certificate Policy (CP), Version 1.3.1 dated August 17, 2009, the Certificate Practices Statement (CPS), Version 1.7.3 dated April 18, 2014 for the GPO Principal Certificate Authority (GPO-PCA), the Certificate Practices Statement, Version 1.7.4 dated April 18, 2014 for the GPO Subordinate Certificate Authority (GPO-SCA), as well as the requirements of the Federal PKI Authority and all current cross-certification Memorandum of Agreements (MOAs) executed by the GPO-CA with other entities, for the period July 1, 2013 through June 30, 2014, GPO has –

- ▶ disclosed its Business, Key Life Cycle Management, Certificate Life Cycle Management, and CA Environmental Control practices in its
 - Certification Practice Statements and
 - Certificate Policy
- ▶ maintained effective controls to provide reasonable assurance that:

- GPO's Certification Practice Statements are consistent with its Certificate Policy
- GPO provides its services in accordance with its Certificate Policy and Certification Practice Statements

▶ maintained effective controls to provide reasonable assurance that

- the integrity of keys and certificates it manages is established and protected throughout their life cycles;
 - Procedures defined in Section 2 (Publication and Repository Responsibilities) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 4 (Certificate Life Cycle) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 6 (Technical Security Controls) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 7 (Certificate, CRL and OCSP Profiles) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
- the integrity of subscriber keys and certificates it manages is established and protected throughout their life cycles;
 - Procedures defined in Section 4 (Certificate Life Cycle) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 6 (Technical Security Controls) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
- the Subscriber information was properly authenticated; and
 - Procedures defined in Section 1 (Introduction) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 3 (Identification and Authentication) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational
- subordinate CA certificate requests are accurate, authenticated, and approved
 - Procedures defined in Section 4 (Certificate Life Cycle Operational Requirements) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.

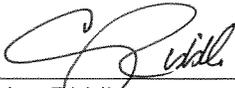

▶ maintained effective controls to provide reasonable assurance that

- logical and physical access to CA systems and data is restricted to authorized individuals;
 - Procedures defined in Section 5 (Facility Management and Operational Controls) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 8 (Compliance Audit and other Assessments) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.
 - Procedures defined in Section 9 subsections 9.4.4 (Privacy of Personal Information – Responsibility to Protect Private Information) and 9.6.3 (Representations and Warranties – Subscriber Representations and

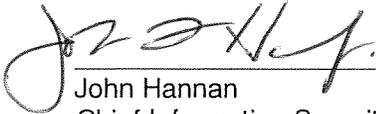

Warranties) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.

- the continuity of key and certificate management operations is maintained; and
 - Procedures defined in Section 5 (Facility Management and Operations Controls) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.

- CA systems development, maintenance, and operations are properly authorized and performed to maintain CA systems integrity
 - Procedures defined in Section 6 (Technical Security Controls) of the GPO PCA-CPS and the GPO SCA-CPS are in place and operational.

Letter of Supplementary Information

To the Inspector General of the United States Government Printing Office and the Management of the United States Government Printing Office Certification Authority (GPO CA):

This letter provides supplementary information to the examination performed by Ernst & Young LLP of the assertion by the management of the GPO-CA regarding the certification authority services it provides at <http://www.gpo.gov/projects/pki.htm>.

Management's assertions were based on the American Institute of Certified Public Accountants (AICPA)/Canadian Institute of Chartered Accountants WebTrust for Certification Authorities criteria. GPO-CA's management was responsible for its assertion. Our responsibility was to express an opinion on management's assertion based on our examination.

Our examination was conducted in accordance with attestation standards established by the AICPA and, accordingly, included examining, on a test basis, evidence about GPO's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our examination provides a reasonable basis for our opinion. Our examination does not provide a legal determination on GPO-CA's compliance with specified requirements.

The period for this examination was from July 1, 2013 through June 30, 2014. Our examination was performed between March 26, 2014 and July 30, 2014.

We examined the Certificate Policy (CP) for the GPO-CA version 1.3.1, dated August 17, 2009, the Certification Practices Statement (CPS) for the GPO Principal Certification Authority (GPO-PCA) version 1.7.3, dated April 18, 2014 and the Certificate Practices Statement for the GPO Subordinate Authority (GPO-SCA) version 1.7.4 dated April 18, 2014. Multiple Root CAs were not in operation at GPO-CA.

Our examination included, through our testing of management's assertion, the evaluation of GPO-CA's operations for conformance to the requirements of its CPSs and the evaluation of GPO-CA's operations for conformance to the requirements of all current cross-certification Memorandum of Agreements (MOAs) executed by the GPO-CA with other entities. In our Report of Independent Accountants dated August 21, 2014, we reported that management's assertion was fairly stated in all material respects.

We have compared the CPS for the GPO-PCA version 1.7.3, dated April 18, 2014, for conformance to the CP for the GPO-CA version 1.3.1, dated August 17, 2009. We have also compared the CPS for the GPO-SCA version 1.7.4, dated April 18, 2014, for conformance to the CP for the GPO-CA version 1.3.1, dated August 17, 2009. We found, in all material respects, that the GPO-PCA CPS and the GPO-SCA CPS are in conformance with GPO-CA CP.

We have compared the CPS for the GPO-PCA version 1.7.3, dated April 18, 2014 and the CPS for the GPO-SCA version 1.7.4, dated April 18, 2014 for conformance to the FPKI Common Policy. For this analysis we utilized the Framework Certification Practice Statement Evaluation Mapping Matrix, Version 2.8 (September 22, 2010). We found, in all material respects, that the GPO-PCA CPS and the GPO-SCA CPS are in conformance with the requirements of the FPKI Common Policy.

We are independent of the GPO for the professional engagement period as required by the AICPA Professional Standards.

Summary of matters related to project personnel provided by Ernst & Young LLP

To the Inspector General of the United States Government Printing Office and the Management of the United States Government Printing Office Certification Authority (GPO-CA):

The GPO Office of Inspector General (OIG) has asked Ernst & Young LLP (EY or we) to provide certain information to assist in its efforts to provide the Federal Public Key Infrastructure Policy Authority (FPKIPA) with information about the individuals who performed work as part of the WebTrust for Certification Authority (WTCA) examination services; these services are performed in accordance with relevant American Institute of Certified Public Accountants (AICPA) standards. The FPKIPA sets policy governing operation of the U.S. Federal PKI Infrastructure, composed of: the Federal Bridge Certification Authority (FBCA); the Federal Common Policy Framework Certification Authority (CPFCA); the Citizen and Commerce Class Common Certification Authority (C4CA) and the E-Governance Certification Authority. EY makes no representation regarding the sufficiency of this information for the purposes for which this information was requested. That responsibility rests solely with the FPKIPA.

Educational level and professional experience

Client serving personnel (Professionals) EY has provided to the Agency have received a degree from an accredited college or university (or its equivalent if the individual was educated outside of the United States). Certain individuals may also have advanced degrees. The majority of Professionals provided to the Agency are part of EY's Advisory Services (AS) service line. Recruiting efforts for the AS practice focuses on candidates with information technology, accounting, finance and other business-related degrees. Hiring activities and types of Professionals hired into each EY service line, including Assurance and Tax, are generally the same as similar service lines and personnel of Deloitte, PwC and KPMG (who along with EY, are the Big Four).

The experience levels of Professionals provided will vary based upon various factors including age and length of time the individual has worked since receiving their degree. The amount of professional experience of Professionals may not solely be related to a person's employment period with EY, as EY normally hires a combination of experienced Professionals and Professionals who recently graduated from a college or university. In most cases, the experience level within a rank classification of EY Professionals is generally the same as the other Big Four.

Methodologies, policies and procedures

EY Professionals carrying out WTCA examinations are required to comply with policies and procedures within the EY Global Advisory Quality Guide (“the Guide”) and related methodologies. In those cases where we do not perform work directly under the supervision and responsibility of Agency personnel as part of an engagement to provide loan staff, and we provide management with our findings and recommendations in those areas where we observe internal controls that, in our view, could be improved, the Guide requires the work and any reports or deliverables to be in accordance with the Statement on Standards for Consulting Services (CS100) of the AICPA. The initial adoption of, and any subsequent changes in, policies and procedures have been reviewed and approved by EY’s Professional Practice group.

Professional certification and continuing education

EY encourages its Professionals to obtain a professional certification. In certain service lines, obtaining a professional certification is a requirement for promotion. Individuals in AS are required to obtain a professional certification to be promoted to Manager. In the AS service line, the most common certifications are Certified Public Accountant (CPA) (or its equivalent in other countries), Certified Internal Auditor (CIA) as recognized by the Institute of Internal Auditors, Certified Information Systems Auditor (CISA) as recognized by ISACA, or Certified Management Accountant (CMA) as recognized by the Institute of Management Accountants.

The continuing professional education requirements of the SEC (Securities and Exchange Commission) Practice Section of the AICPA Division for CPA firms are the foundation of EY’s professional development policy. Participation in professional development programs is measured in units of continuing professional education (CPE) credit hours earned in our educational year. EY’s educational year is July 1 through June 30. The EY policy for compliance is as follows:

- ▶ Commencing with the first full educational year of employment, each professional must obtain at least 20 CPE credit hours each year and at least 120 CPE credit hours during the most recent three-year period.
- ▶ Professionals who were not employed during the entire most recent educational year are not required to earn continuing professional education credits in that year.
- ▶ Professionals who were employed during the entire most recent educational year, but not during the entire most recent two educational years, are required to have participated in at least 20 hours of qualifying continuing professional education during the most recent educational year.
- ▶ Professionals who were employed during the entire most recent two educational years, but not during the entire most recent three educational years, are required to have participated in at least 20 hours of qualifying continuing professional education during each of the two most recent educational years.

Professionals who hold a professional designation or certification other than the CPA certification (e.g., CIA, attorney at law, CISA, CMA) may be subject to continuing education requirements as part of that designation or certification. Completion of courses to meet these requirements may be used to meet the firm's CPE requirements as long as the courses also meet the requirements of the AICPA's SEC Practice Section.

Experience Auditing PKI Systems

The EY executive team assigned to the GPO project has experience in performing audits and implementation of PKI systems and IT security. In addition, certain team members also have participated in a number of other commercial PKI and WebTrust for CA examinations both as a team member and as a quality reviewer. We have incorporated consultations with other EY personnel who represent the firm on the AICPA WebTrust Task Force. EY's client roster for PKI projects for governmental agencies other than the GPO includes other US federal agencies as well as foreign governmental monetary organizations.

We are available if you need any additional information or would like to further discuss this memorandum.

Ernst + Young LLP
