

met, the ITPs will be issued for incidental take of the Florida scrub-jay. We will also evaluate whether issuance of the section 10(a)(1)(B) ITPs comply with section 7 of the Act by conducting an intra-Service section 7 consultation. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITPs. This notice is provided pursuant to section 10 of the Endangered Species Act and National Environmental Policy Act regulations (40 CFR 1506.6).

Dated: July 3, 2006.

Cynthia K. Dohner,

Acting Regional Director, Southeast Region.

Fish and Wildlife Service

Endangered and Threatened Wildlife and Plants; Draft Recovery Plan for *Astragalus holmgreniorum* (Holmgren milk-vetch) and *Astragalus ampullarioides* (Shivwits milk-vetch)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability for review and comment.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces availability for public review a draft recovery plan for the Holmgren milk-vetch (*Astragalus holmgreniorum*) and Shivwits milk-vetch (*Astragalus ampullarioides*). These species are federally listed as endangered under the Endangered Species Act of 1973, as amended (Act). The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before August 31, 2006.

ADDRESSES: Copies of the draft recovery plan are available by request from the Utah Field Office, U.S. Fish and Wildlife Service, 2369 West Orton Circle, Suite 50, West Valley City, Utah 84119 (telephone 801-975-3330). Submit comments on the draft recovery plan to the Field Supervisor at this same address. An electronic copy of the draft recovery plan is available at <http://endangered.fws.gov/recovery/index.html#plans>.

FOR FURTHER INFORMATION CONTACT: Field Supervisor, at the above address, or telephone 801-975-3330.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for the federally listed species native to the United States where a plan will promote the conservation of the species. Recovery plans describe site-specific actions necessary for the conservation of the species, establish objective, measurable criteria which, when met, would result in a determination that the species no longer needs the protection of the Act (16 U.S.C. 1531 *et seq.*), and provide estimates of the time and cost for implementing the needed recovery measures.

The Act requires recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and opportunity for public review and comment be provided during recovery plan development. The Service will consider all information received during a public comment period when preparing each new or revised recovery plan for approval. The Service and other Federal agencies also will take these comments into consideration in the course of implementing approved recovery plans. It is our policy to request peer review of recovery plans, and we will summarize and respond to the issues raised by the peer reviewers in a determination appendix to the approved recovery plan.

Holmgren milk-vetch and Shivwits milk-vetch are endemic to the Mojave Desert around St. George, Utah. These perennials were listed as endangered in October 2001 (66 FR 49560, September 28, 2001) due to their rarity and declining population trends as well as the threats of urban development, off-road vehicle use, grazing, displacement by invasive plants, and mineral development. Critical habitat was proposed for these species on March 29, 2006 (71 FR 15966). For the purpose of recovery each species comprises six extant populations located in Washington County, Utah, with one Holmgren milk-vetch population extending into Mohave County, Arizona. This also represents the known historic distribution, although it is probable that both species occupied more habitat in the past.

Holmgren milk-vetch occurs at elevations between 756 and 914 meters

(2,480 and 2,999 feet) in areas that drain to the Santa Clara and Virgin Rivers. It is typically found on the skirt edges of hill and plateau formations slightly above or at the edge of drainage areas; it occurs on soils characterized by small stone and gravel deposits and where living cover is less than 20 percent of the landscape. Shivwits milk-vetch is found in isolated pockets of Chinle and Moenave soils around St. George. Occupied sites are small, and populations are found between 920 and 1,330 meters (3,018 and 4,363 feet) in elevation in sparsely vegetated habitat with an average 12 percent cover. Shivwits milk-vetch is thinly and discontinuously distributed within its habitat; Shivwits milk-vetch is found in dense patches. Depending on precipitation, Holmgren milk-vetch has variable seedling output followed by a low rate of survivorship, limiting the number of reproductive adults within a population; Shivwits milk-vetch is constrained by the isolation of appropriate soil substrate and limited mechanisms for seed dispersal.

Recovery of Holmgren milk-vetch and Shivwits milk-vetch will hinge on conservation of extant populations and establishment of enough additional populations to ensure long-term demographic and genetic viability. This will require the active involvement of experts and the public as well as a continuing recognition of the role each milk-vetch plays in the ecology of southwestern Utah and, in the case of Holmgren milk-vetch, northwestern Arizona. Because of the biological and historical uncertainties regarding the status and recovery potential of these species, the recovery strategy is necessarily contingent on a growing understanding of the species and their ecological requirements. Consequently, a dynamic and adaptive approach will be key to making effective progress toward full recovery.

Public Comments Solicited

The Service solicits public comments on the draft recovery plan described. All comments received by the date specified will be considered prior to approval of the plan. Written comments and materials regarding the plan should be addressed to the Field Supervisor (see **ADDRESSES** section). Comments and materials received will be available, by appointment, for public inspection during normal business hours at the above address.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: July 5, 2006.

James J. Slack,

Deputy Regional Director, Denver, Colorado.

BILLING CODE 4310-55-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Meeting Announcement: Sporting Conservation Council

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: This notice announces the first meeting of the Sporting Conservation Council (Council). The meeting is open to the public. Agenda items tentatively include presentations by the Fish and Wildlife Service and the Bureau of Land Management, an overview of the Federal Advisory Committee Act, a session on ethics, election of the Council chairperson by members of the Council, development of a plan to address Council objectives, and a discussion on future meetings. The meeting will also include a session for the public to comment.

DATES: We will hold the meeting on August 16 and 17, 2006, from 9 a.m. to 4:30 p.m. From 9 a.m. to 10 a.m. on August 17, we will host a public comment session.

ADDRESSES: The meeting will be held at 250 Station Drive, Missoula, Montana 59801.

FOR FURTHER INFORMATION CONTACT:

Phyllis T. Seitts, 9828 North 31st Avenue, Phoenix, Arizona 85051-2517; 602-906-5603 (phone); or Twinkle_Thompson-Seitts@blm.gov (e-mail).

SUPPLEMENTARY INFORMATION: The Secretary of the Interior established the Sporting Conservation Council in February 2006. The Council's mission is to provide advice and guidance to the Federal Government through the Department of the Interior on how to increase public awareness of: (1) The importance of wildlife resources, (2) the social and economic benefits of recreational hunting, and (3) wildlife conservation efforts that benefit recreational hunting and wildlife resources.

The Secretary of the Interior and the Secretary of Agriculture recently signed an amended charter for the Council. The revised charter states that the Council will provide advice and guidance to the Federal Government through the Department of the Interior and the Department of Agriculture.

The Council will hold its first meeting on the dates shown in the **DATES** section at the address shown in the **ADDRESSES** section. The meeting will include a session for the public to comment.

Dated: July 24, 2006.

Phyllis T. Seitts,

Designated Federal Officer, Sporting Conservation Council.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Meeting of the Trinity Adaptive Management Working Group

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of meeting.

SUMMARY: The Trinity Adaptive Management Working Group (TAMWG) affords stakeholders the opportunity to give policy, management, and technical input concerning Trinity River restoration efforts to the Trinity Management Council. Primary objectives of the meeting will include: Trinity River Restoration Program Fiscal Year 2007 budget; science framework; TAMWG Charter renewal; Executive Director's report; reports from Trinity River Restoration Program workgroups; Klamath River conditions and Klamath-Trinity management coordination; restoration experience on Clear Creek; and Central Valley Project Improvement Act (CVPIA) program review. Completion of the agenda is dependent on the amount of time each item takes. The meeting could end early if the agenda has been completed. The meeting is open to the public.

DATES: The Trinity Adaptive Management Working Group will meet from 1 p.m. to 5 p.m. on Tuesday, September 12, 2006, and from 8:30 a.m. to 1 p.m. on Wednesday, September 13, 2006.

ADDRESSES: The meeting will be held at the Weaverville Victorian Inn, 1709 Main St., 299 West, Weaverville, CA 96093; telephone: (530) 623-4432.

FOR FURTHER INFORMATION CONTACT: Randy A. Brown of the U.S. Fish and Wildlife Service, Arcata Fish and Wildlife Office, 1655 Heindon Road, Arcata, California 95521; (707) 822-7201. Randy A. Brown is the working group's Designated Federal Officer.

SUPPLEMENTARY INFORMATION: Under section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App), this notice announces a meeting of the

Trinity Adaptive Management Working Group (TAMWG). For background information and questions regarding the Trinity River Restoration Program, please contact Douglas Schleusner, Executive Director, Trinity River Restoration Program, P.O. Box 1300, 1313 South Main Street, Weaverville, California 96093; (530) 623-1800.

Dated: July 20, 2006.

Joseph Polos,

Supervisory Fishery Biologist, Arcata Fish and Wildlife Office, Arcata, CA.
